

## Pre- lab Report Format

**Pre-lab:** This will be written on a **separate sheet of paper** prior to your lab day. This will be your source of information during the lab. **You must do the pre-lab, or you cannot complete the lab.** Your pre-lab should include the following:

**Purpose:** What is the lab's objective/purpose?

**Hypothesis:** Propose your best educated guess, based on previous experience, observations, research, etc. for each portion of the lab.

**Materials:** Write the list of materials you will use to complete the lab.

**Procedure:** Write the list of the steps you will follow to complete the lab. You should be able to perform the experiment based on what you write down.

**Safety:** Include any safety considerations necessary to complete the lab.
