

**4. Find an expression for the table.**

x	
30	3
40	4
50	5

y	
10	6
13	9
20	16

p	
7	14
15	30
20	40

k	
36	6
30	5
12	2

b	
15	10
37	32
50	45

**5. Evaluate each expression for the given value of the variable.**

$$p + 8 \text{ for } p = 15 \quad \underline{\hspace{2cm}}$$

$$x \div 5 + x \text{ for } x = 10 \quad \underline{\hspace{2cm}}$$

$$9x - 10 \text{ for } x = 5 \quad \underline{\hspace{2cm}}$$

$$4^2 + 6n \text{ for } n = 3 \quad \underline{\hspace{2cm}}$$

Place a number in each blank that makes the equation correct.

**REMEMBER: Keep it balanced on both side of the equal mark.**

$$1. 12 + 4 = 10 + \underline{\hspace{2cm}}$$

$$2. \underline{\hspace{2cm}} \times 2 = 10 \times 4$$

$$3. 28 \div 4 = 14 \div \underline{\hspace{2cm}}$$

$$4. 10 - \underline{\hspace{2cm}} = 12 - 7$$

$$5. 3 \times \underline{\hspace{2cm}} = 2 \times 9$$

$$6. 12 \times 0 = \underline{\hspace{2cm}} \times 15$$

$$7. 45 \div \underline{\hspace{2cm}} = 6 + 3$$
